

An award winning mobile LBS solution

Uandme provides your users with a rich, consumer-friendly WAP, SMS and desktop experience. Designed with privacy in mind, it is safe, quick to deploy and has all the social network integration you need built in.

Based on Open Mobile Alliance (OMA) standards, Uandme provides rich, consumer-friendly WAP/xHTML, SMS and Web 2.0-based user experiences. Including a sophisticated privacy framework, Uandme is safe, quick to deploy and is marketable virally through existing subscriber communities. Uandme is also compatible with our social networking framework, which permits location-sharing via off-portal social networks such as Facebook, Twitter and Friendster.
